

INTEGRATED LOGIC

Smart Entertainment

Case Study

Project Type: High-end residential new build

Location: Ranmore Common, Surrey

Services:

- Dedicated home cinema
- Audio video

The Brief in Brief:

The team at Integrated Logic were briefed to design and create a luxurious, inspiring and immersive smart home cinema experience, from the comfort of the client's own home.

Our Solution:

With a reputation built on an exemplary record of high quality, on time and on budget delivery, Integrated Logic were appointed to recommend and seamlessly integrate an array of the latest smart home cinema systems.

To introduce the finest viewing experience out there and ensure HDR compatibility, our team installed LG's OLED 4k 65inch screen TV. To further enhance the versatility of the home cinema experience a Sony PS4 was installed, alongside a range of speakers known for their high audio quality.

Other products installed were: Pioneer Sc-lx901 receiver, Audioquest carbon HDMI leads, Chord Odyssey 2 speaker cable, MK LCR750 front and centre speakers, MK S55T surrounds and MK V10 Subwoofer.

Solid walls throughout the property meant cable runs were a challenge. To overcome this, we worked closely with the homeowners to plan the correct cable infrastructure in the most accurate and efficient way.

We also worked hard to make the best use of the space, with loose cables and TV units becoming a thing of the past. What's more, the system's flexibility to integrate other sub-systems at a later date, such as lighting and heating control was integral to the design and installation process.

The End Result:

Integrated Logic created a simplified, easy-to-use and immersive smart entertainment experience by incorporating high-resolution audio, best-in-class surround sound and a large smart TV.

The best bit? All these systems are controlled via one easy-to-use remote.
